

ENVIRON® VITAMIN SKIN CARE PRODUCTS

Amber Health, Beauty and Sports Injury Clinic are pleased to recommend and offer Environ Vitamin Skin Care Products both as retail to our Clients, but that we also use these products intensively with our range of Special Facials, Skin Care and CACI Anti-ageing services available to Clients.

Ageing is a chronic disease that needs daily treatment starting before the visible signs show, after all prevention is better than cure. As we get older, more intensive treatment is required. Daily treatment using the Environ® range will help reduce and delay the signs of photo-ageing.

Environ® skin care products have been formulated to combat and relieve the harmful effects of the harsh climatic changes of today's environment specifically pollution and ever-increasing doses of radiation from the sun due to the thinning of the protective ozone layer. Added to these are the modern-day effects of social and work stresses and poor diet.

The Environ® products offer a definite regime to nourish, protect and maintain a healthy, youthful and beautiful skin. Each product is made from the highest quality ingredients. They are mostly free from fragrance, preservatives, colourants and animal extracts.

All our Products are provided by the **International Institute for Anti Aging (iiAA)** <http://www.iaa.eu/> established in London in 2005 and come certified to have not been radiated when they pass through UK Customs, as this process seriously damages the Products when they are imported from South Africa.

The Environ <http://www.environ.co.za/> range of face and body products, for homecare and professional use, were developed by Dr. Des Fernandes, a respected South African plastic surgeon. His concern about the increasing incidence of skin cancer led him to research the most effective ingredients to protect healthy skin at an early age and to treat the increasing problems associated with photo-damaged skin.

Since 1987, Dr Fernandes has stressed the need for daily replacement of a “brigade” of vitamins and anti-oxidants in the skin that are destroyed by exposure to light. He has been one of the pioneers in the use of vitamin A and the anti-oxidant vitamins C, E and beta-carotene – as a means to treat, normalize and protect the skin. Dr Fernandes was the first person in the world to introduce vitamin A in high doses in cosmetic creams.

The Environ philosophy <http://www.environ.co.za/> is that by protecting our skin from UV rays, pollution, bad diet and stress we can prevent premature ageing and maintain a healthy, beautiful skin for a lifetime. Environ normalizes skin, providing skincare to prevent

and to treat photo-damage, problem skin, pigmentation and scarring and is suitable for children, men and women.

Environ is also used as an effective pre- and post-operative treatment by plastic surgeons for cosmetic surgery patients: the vitamin ingredients promote normal cell growth, optimizing the health of the skin and minimizing any scarring following surgery. The range of products, bridge the gap between modern medical science and beauty therapy, and the inclusion of scientifically proven, active ingredients in high enough concentrations ensures effectiveness.

Homecare products are usually prescribed following a consultation with an iiAA Environ therapist and all **Amber Health, Beauty and Sports Injury Clinic Therapists** are iiAA trained, and will only recommend products with the appropriate level of activity to suit each individual. **Amber Health, Beauty and Sports Injury Clinic** salon treatments enhance the penetration of active ingredients delivering even better results more quickly.
