**SERIOUS ABOUT FIRE SAFETY?
.....PROVE IT.**

Let City and District take the stress away.

Our role is to save you time and remove the stress and worry that naturally occurs when our customers without fire risk experience feel the need to carry out a fire risk assessment themselves without prior training.

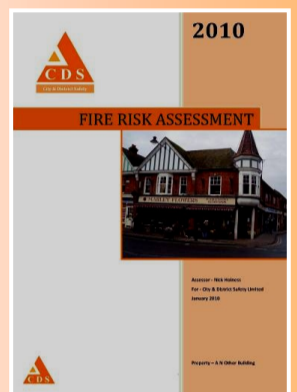

Book your complimentary Fire Risk Consultation today on **01622 882 282**

FIRE RISK ASSESSMENT

**Need Help with your Fire Risk Assessment ?
Too Busy to do it Yourself but Need it Done ?**

CDS FIRE SAFETY HAVE THE SOLUTION

*Sample Fire Risk
Assessment*

We provide Schools, Local Boroughs, Housing Organisations, Art Centres, Offices, Factories, Shops and Flats etc with detailed & specific **Fire Risk Assessments**. We provide independent Fire Risk Assessments & Fire Safety Advice to include all aspects of Fire Safety Systems Such as Fire Alarm, Emergency Lighting & Security Systems

Our **Fire Risk Assessments** are designed to comply with the requirements of the 'Regulatory Reform Order (Fire Safety) Act 2005. They are detailed and specific to Fire Risk. We are certificated by the London Fire & Emergency Planning Authority (London Fire Brigade)

Our Core Beliefs

We at City & District Safety believe that Fire Safety & Security should be taken seriously. Our customers are committed to this belief too. In this way we ensure that we deliver quality service, and meet the expectations of our customers every time. We do not deal with organisations that pay 'lip service' to Fire Safety or Security, or are only interested in price. Our goal is to achieve excellent service and value for money; after all, we want our customers to continue to use our services and develop long term partnerships.

Our Background

Directors Nick Holness & Steve Head have been involved in the Fire & Security Industry since 1977 and 1987 respectively. Both come from Engineering and Management backgrounds. They are dedicated and strive to stand above all others in our business sector.

We were first established in April 2000 as [Safescape Services Limited](#) a Fire & Security Company working for organisations such as Chubb, ADT, BMS Healthcare, Borough Councils and many others.

By working closely with [Safescape Services Limited](#) means we can offer a One-Stop-Shop for all Fire & Security Solutions if required.

What we do for you

Following your initial complimentary consultation visit, we then undertake a detailed survey of the building(s), making relevant notes of the processes, people and work activities and taking digital photographs for reference which are relevant to the Fire Risk.

We will ask to see certification or Maintenance Documentation of Fire Extinguishers, Fire Alarm Systems, Electrical Systems, Portable Electrical Appliance Registers, Emergency Lighting, Gas Appliances etc.

Don't worry if you have not got these documents in place, we will identify the areas that require more documentation, and advise accordingly.

Finally we will produce a working multi-page document with photographic references. This document details the relevant significant findings of the **Fire Risk Assessment**, together with the recommendations and actions that you may need to implement.

This Document then forms the foundation of your Fire Safety Strategy, which must be regularly reviewed by law, and take into account any changes of use and activity.

A **Fire Risk Assessment** must be an ongoing document, and carried out on a yearly basis as a minimum, or sooner if changes are made to the Fire Risk.

Call Nick or Steve for Quick Advice & Questions on 07973 194109 or 07855 750533
