

- Page size, layout and margins are correct
- Page includes correct bleeds 2-3mm
- Avoid hairline fills or strokes less than 0.25pt
- Convert all RGB images to CMYK
- Convert spot colours to process colours (only if printed job is full colour)
- Full colour image resolution should be 300dpi
- Line art resolution should be 1200dpi
- Overprint items are set correctly
- Convert fonts to outlines / paths where possible
- Avoid tints of less than 5%
- PDF Files - use PDF/X-1a setting if possible
- To reduce set-off and drying times we recommend a combined ink coverage limit between 225% - 275% from a maximum of 400% (100% of each CMYK)
