NATIONWIDE SAMPLE COLLECTIONS |
Hospitals, General Practice and Clinics |
AROUND-THE-CLOCK 7-DAY SERVICE

Noviche BioScience provides a professional, mobile phlebotomy service for private patients, laboratories, blood/tissue banks, General Practice and health clinics. Our responsibility is to harvest blood samples efficiently and as painlessly as possible, without harming the patient or disturbing the nursing care they are receiving at the time. We ensure the blood is taken correctly, maintaining viability of specimens for analysis. All our phlebotomists are trained and accredited to national standards, which incorporate academic learning with practical skill.

WHAT IS PHLEBOTOMY?

Phlebotomy is the practice of drawing blood from a patient. The word is derived from the Greek words *phlebo* (vein) and *tomy* (to make a cut). A good phlebotomist is worth their weight in gold. Modern phlebotomy shares little more than a name with these ancient practices. Today phlebotomy is performed primarily to diagnose and monitor a patient's condition and involves highly developed and rigorously tested procedures and equipment to ensure the safety and comfort of the patient and the integrity of the sample collected.

Sometimes special tests are requested by doctors that require patients to be fasting; or to be taken at specified times; taken in conjunction with urine samples or require the samples to reach the laboratories within specified timescales.

All our phlebotomists are accredited in the application of monovette and vacutainer, venous and capillary blood collections. We are one of a handful of approved organisations in the UK that provide cord blood and tissue sample stem cell collections.

EXPERIENCE THE BEST IN CARE

Let *Noviche BioScience* skilled professionals collect your specimen when and where you choose and safely transport it to hospital or individual laboratories for you. Remember: an accurate blood test result starts with a quality specimen collection.

Noviche BioScience certified phlebotomists have years of experience collecting specimens. We only engage qualified professionals who share our commitment to improving the quality of blood specimens and raising the standards of patient care.

Noviche BioScience's phlebotomy service was the first mobile phlebotomy service to operate across Staffordshire, Cheshire, Derbyshire, Nottinghamshire, Yorkshire and Leicestershire.

With phlebotomists located in London, Manchester, Leeds, Derby, Bristol, Newcastle and Liverpool, we are changing the way patients think about their phlebotomy service needs by giving you courteous, caring and individualized attention, right in the comfort of your own home.

SERVICE WITH A SMILE

Noviche BioScience specializes in mobile phlebotomy services including blood samples and specimen collections, as well as other in-home related outpatient services.

Our experienced and professional phlebotomists perform successful blood draws on all kinds of people every day with many ending with a smile on the patient's face.

CORD BLOOD STEM CELLS

Noviche BioScience provides parents-to-be access to the most reputable and responsible blood and tissue banks in the UK and using our extensive network of phlebotomists we collect cord blood stem cells from every location in the UK.

Stem cells offer a living health insurance against possible future illness and disease and storing your baby's stem cells can provide a real lifeline in the event of them falling seriously ill. If you are considering storing your baby's stem cells the first thing to do is to contact a company offering the service for advice.

DOMICILIARY SERVICE

Our phlebotomy services help to reduce the workload of doctors and nurses by focusing exclusively on blood collection, particularly in clinics, hospitals, health centres, places of work, or patients' homes (referred to as our domiciliary service).

With years of experience we provide a complete range of services to ensure the process runs efficiently, from taking the blood sample to delivering it to the laboratory. But most importantly, we will try our utmost make the experience as pleasant as possible for the patient.

STRESS-FREE EXPERIENCE

Our goal is to provide positive, stress-free experiences for all patients. The only thing we need is a doctor's requisition and your permission.

- In the comfort of your own home, hospital or clinic
- No need to schedule time away for an appointment
- Personalized, friendly and professional service
- Appointments usually available within 48hrs
