

New Children's Centre & Refurbishment of the adjoining, existing classroom

Project Title	New Children's Centre & Refurbishment
Location	Westfield Primary School
Client	Bath & North East Somerset Council
Architect / Contract Administrator	GCP Architects
Contract Value	£384,000
Duration of Works	24 Weeks
Completion	27th November 2009
Procurement Method	Tendered
Contract No.	1521

The work comprised construction of a new single storey building extension to Westfield Primary School and refurbishment of an existing classroom connected to the new building. The purpose of the development is to house a Children's Centre and playgroup. The building was constructed off strip foundations, with a 215mm single leaf Celcon hi-thermal block substructure and concrete slab above. The external walls also utilised the single leaf Celcon thermal block, with internal studwork lining insulation and plaster boarding. Externally, the block was clad with either cedar cladding or through colour render. An sound-proof ceiling was incorporated in the structure, to reduce noise levels. The new building comprises a staff room / office, children's WCs, storerooms, a meeting room, kitchen, disabled WC, with a covered external hardstanding area and grassed play areas.
